

STANDARD INSTALLATION INSTRUCTIONS FOR DOOR CLOSER

Standard installation method: vertical installation at sliding door side

Right hand door installation diagram left hand door installation size is the same

Reminder:

Adjust the closing time: adjust the closing time from 90°-0° to 4s-6s, and the user can extend the time appropriately if there are old people or children.

Warning user:

- (1) do not screw the governor valve out of the main body of the door closer to avoid oil leakage, resulting in unstable operation of the product.
- (2) when closing the door, let the door close freely under the action of the door closer. Do not apply additional force, otherwise the door closer may be damaged.
- (3) please install according to the use scope and size of this manual.
