This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmon European standards listed under the EMC Directive 2014/30/EU, RE Directive 2014/53/EU, the RoHS Directive 2011/65/EU

replacement of a battery with an incorrect type that can defeat a safeguard (for example, in the case of some lithium battery types);
— disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;
— leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas; and
— a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplies upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see:www.recyclethis.info

- 1. Do not ingest battery. Chemical Burn Hazard
- 2. Keep new and used batteries away from the children.
 3. If the battery compartment does not close securetyly, stop using the product and keep it away from children.
- 4. If you think batteries might have been swallowed or placed inside any part of the body, seek immediate medical attention.

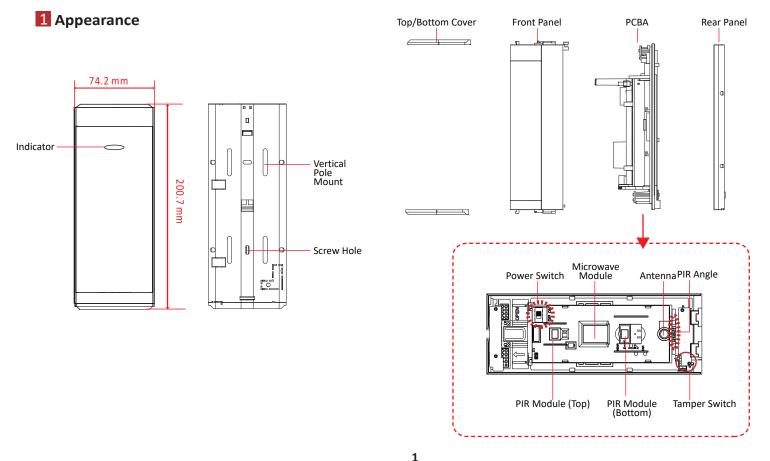

- 1. Risk of fire or explosion if the battery is replaced by an incorrect type
- 2. Improper replacement of the battery with an incorrect type may defeat a safeguard (for example, in the case of some lithium battery types).

 3. Do not dispose of the battery into fire or a hot oven, or mechanically crush or cut the battery, which may result in an explosion.

 4. Do not leave the battery in an extremely high temperature surrounding environment, which may result in an explosion or the leakage of flammable liquid or gas.

 5. Do not subject the battery to extremely low air pressure, which may result in an explosion or the leakage of flammable liquid or gas.

 6. Dispose of used batteries according to the instructions

2 Enrollment

- 1. EnrollmentEnrollment Preparation
- Log in to the APP Store, download and install the App.

Power on the security control panel.

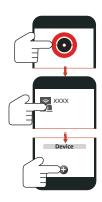

Log in the APP and tap the icon "+". Scan the QR code or input the control panel serial No. to add the control panel.

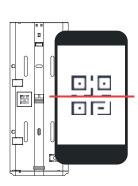

1 Enroll the Peripheral Locally

In the APP, tap the "Enrollment Mode" button on the control panel page to make the control panel enter the enrollment status.

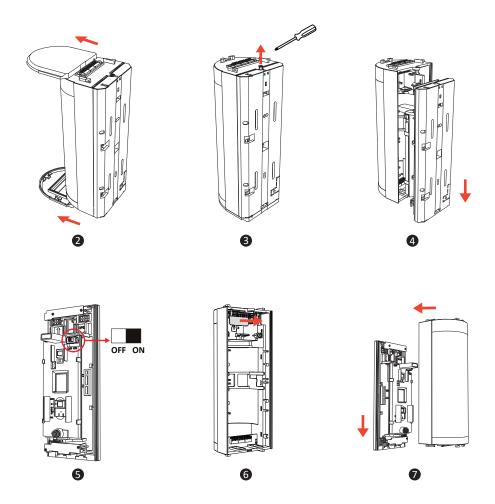

Enroll the Peripheral with QR and serial No.

In the APP, tap the icon "+" and scan the QR code or serial No. on the peripheral.

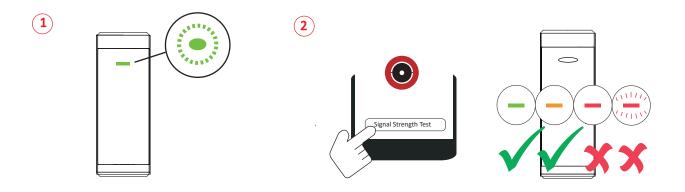

- 2. Push the top and bottom covers forward and remove them. 3. Loosen the screw.
- 4. Push the rear shell and the middle frame downward and remove them.
- 5. Power on the detector.
- 6. Remove the battery insulator.
 7. Install the front shell back.

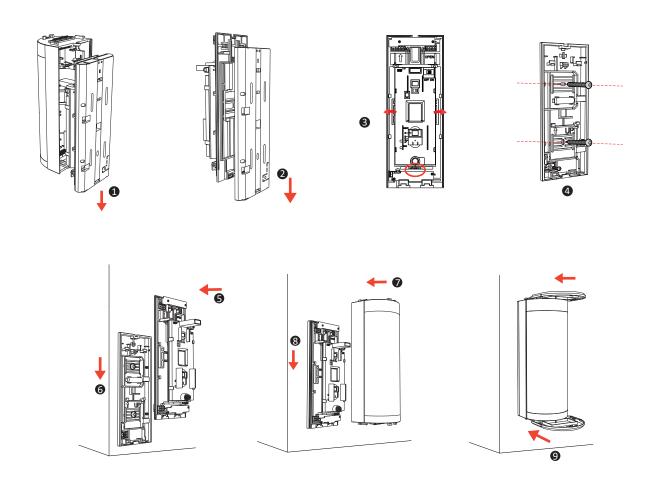

8. Check signal strength.
(1) Enrollment succeeded: Flash green for 7 times.
Note: The front panel should be installed before powering on successfully. (2) Check Signal Strength
Solid Green for 3 s - Strong Signal
Solid Orange for 3 s - Medium Signal
Solid Red for 3 s - Weak Signal
Flash Red for 6 times - Lost Signal

3 Installation

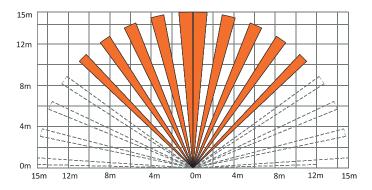

- 1. Push the rear shell and the middle frame downward and remove them again.

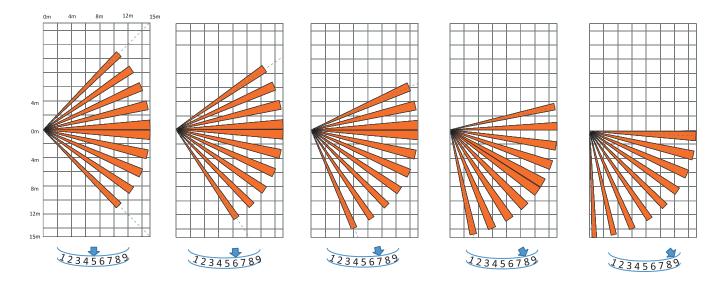

- Push the rear shell and the middle frame downward and remove them again.
 Separate the rear shell and the middle frame.
 Rotate the PIR button according to your actual needs.
 Secure the rear panel with 2 screws. If the wall is not smooth enough, adjust the tamper screw to secure.
 Install the middle frame back to the rear shell.
 Install the front panel back.
 Push the top and bottom covers back.

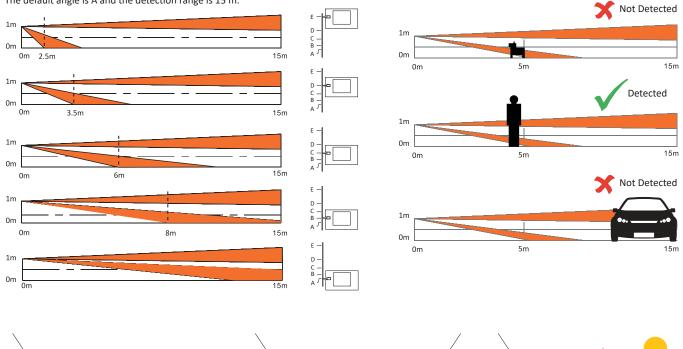

4 Detection Range

There are 9 scales in the horizontol direction to realize 90° rotation adjustment. The average angle of one scale is 90/8.

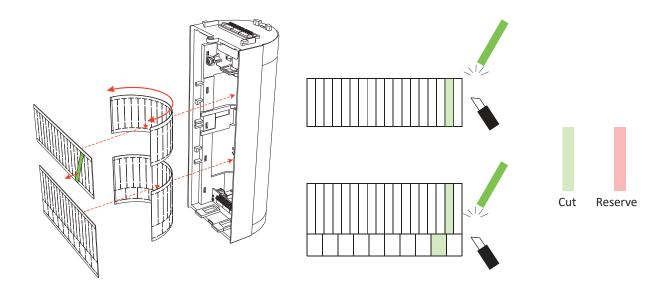

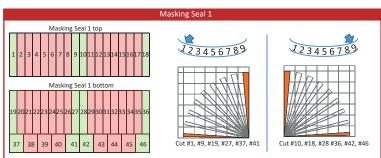

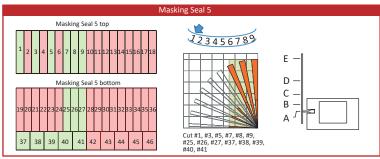

There are 5 scales in the vertical direction to adjust the detection distance. The default angle is A and the detection range is 15 m.

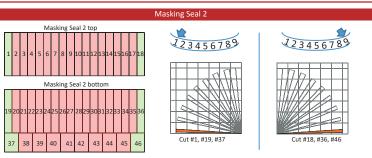

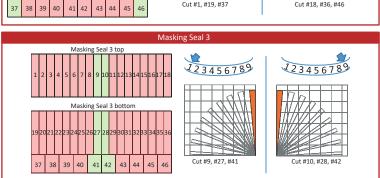

Cut off the knockout portion with a cutter knife. Stick it on the lens in the corresponding area.

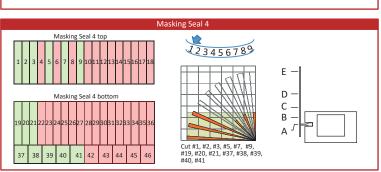

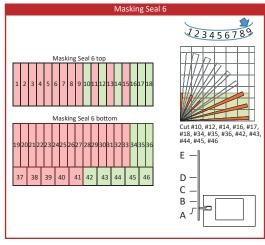

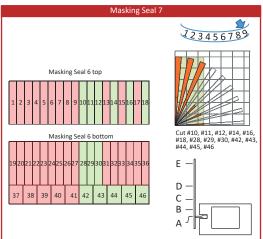

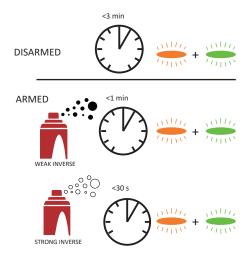

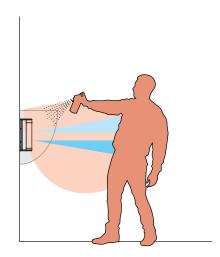

5 Anti-Masking Alarm

6 Set Up with App

You can view the device status including temperature, signal intensity, battery level, lid, external input, etc.,on the device page. Tap the 🔾 button to enter the settings page.

7 Operation Caution and Device Maintenance

- All the electronic operation should be strictly compliance with the electrical safety regulations, fire prevention regulations and other related regulations in your local region.
- Do not drop the device or subject it to physical shock, and do not expose it to high electromagnetism radiation. Avoid the equipment installation on vibrations surface or places subject to shock (ignorance can cause equipment damage).
- Please make sure that the power has been disconnected before you wire, install or dismantle the device.
- If smoke, odors or noise rise from the device, turn off the power at once and unplug the power cable, and then please contact the service center.
- Do not drop the device or subject it to physical shock, and do not expose it to high electromagnetism radiation. Avoid the equipment installation on vibrations surface or places subject to shock (ignorance can cause equipment damage).
- Do not place the device in extremely hot (refer to the specification of the device for the detailed operation temperature), cold, dusty or
- damp locations, and do not expose it to high electromagnetic radiation.
 The device for indoor use shall be kept from rain and moisture.

Exposing the equipment to direct sun light, low ventilation or heat source such as heater or radiator is forbidden (ignorance can cause fire danger).

- Do not aim the device at the sun or extra bright places. A blooming or smear may occur otherwise (which is not a malfunction however), and affecting the endurance of sensor at the same time.
- Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only. Dispose of used batteries according to the instructions provided by the battery manufacturer.
- Do not expose the device to the corrosive gas. Otherwise the equipment damage may occur.
- Do not expose the device to the explosive situation.

8 Specification

DS-PDTT15AM-LM-WB Method Passive Infrared,Microwave

Detection Range	15 m
Detection Angle	90° @ 180° adjustable
Detection Zones	92
Detectable Speed	0.3~2 m/s
Sensitivity	Auto, Low
White Light Filter	10000 lux
Microwave Frequency	24 GHz(24~24.25 GHz)
Pet Immunity	45 Kg
Anti-masking	Support
Adaptable Coverage	Support
	Pattern mask included
Digital Processing	Tri-Signal Logic
Sealed Optics	Support
Tamper Protection	Front,Rear
Environment Temperature	Support
Indicator	зарроге
Signal Strength Indicator	Support
Anti-Sway Analytics	Support
Power Switch	Power Up Enrolling
LED Indicator	Green(Top PIR), Red(Microwave),
	Orange(Bottom PIR), Green+Orange(Mask),
	Blue(Alarm)
Transmission Technology	Tri-X Wireless
Transmission Method	Two-Way RF Wireless
Transmission Method Transmission Frequency	Two-Way RF Wireless 433 MHz(433.1 MHz~433.7MHz)
