Contra a proposta de Vassouras, o presidente da Cade, Celso Furtado, argumentou que a reunião entre os representantes das empresas e o prefeito não é uma discussão de caráter político, mas sim uma negociação entre empresas e governo.

Bradykinin B-Arg-Phe-Pro-Gly-Phe-NH<sub>2</sub> (BAPK) is a decapeptide that has been shown to induce pain in humans. It is a potent agonist at the B<sub>1</sub> receptor, which is found in the central nervous system and peripheral nerves. The B<sub>1</sub> receptor is coupled to G-proteins, leading to the activation of phospholipase C and subsequent release of arachidonic acid. This results in the formation of prostaglandins and other inflammatory mediators that contribute to the perception of pain.
